

Lachlan Haar

I have been a Firefighter and FBEU member since 2009. I have both operational and operational support experience. I am currently working at Fire Safety, having previously worked at inner western and western Sydney stations. I have also been attached to Regional West Area Command. My overall experience means I am well placed to offer ideas and opinions across a wide variety of policy areas. Our population is growing but our Firefighter numbers are not, this needs to change.

I will bring new ideas and viewpoints to the SCOM. If elected I would be an independent voice for the Sydney Inner West Sub-Branch and for all.

- I will listen to your ideas and be your voice on SCOM
- I will be readily available to assist you with local matters
- I will commit to growing more career opportunities in the job, more operational and operational support positions
- I will promote the introduction of more operational support positions outside of Sydney
- I will push for more training positions in Metropolitan and Regional areas
- I support electronic voting
- I will ensure injured Firefighters are treated with dignity and respect
- I back the introduction of Firefighters' presumptive rights for compensation for diseases and injuries
