- 25.6.4. Should an employee fail to make a claim within the time frame specified at subclause 25.6 this failure in no way negates the ability of the employees to make the claim. Delay in making a claim will not be used a reason to deny any claim by an employee under this clause.

Schedule 3 - Safe Staffing

Minimum Safe Staffing Numbers

Minimum Safe Staffing numbers for retained brigades are based on the number of firefighters required to crew the appliances allocated to the brigade plus allowance for factors such as leave availability of staff and relieving components.

For the primary appliance at the station the standard is:

- the minimum crew required for the appliance, plus
- an availability component of another minimum crew, plus
- a relieving component of 50% of the above.

For each additional appliance allocated to the brigade the standard is:

- the minimum crew required for the appliance, plus
- a relieving component of 50% of the minimum crew.

There is no additional availability component for additional appliances, as the availability component for the primary appliance is sufficient to cover the additional appliances.

The positions of Captain and Deputy Captain are included in these crew numbers.

Table 1: Examples of standard establishments for primary appliances

Appliance	Minimum crew	Availability component	Relieving component	Standard establishment
Pump	4	4	4	12
Water tanker	2	2	2	6
Composite	4	4	4	12

Table 2: Examples of standard establishments for additional appliances

Appliance	Minimum Crew	Relieving component	Standard establishment
Second pump	4	2	6
Water tanker	2	1	3
Composite	2	1	3
Hazmat and rescue support vehicles	2	1	3

Without Precedent / Without Prejudice
For Discussion Purposes Only

Applying these calculations results in the following typical examples of standard establishments:

Table 3: Examples of standard establishments

Appliances allocated	Standard establishment
Pump and water tanker	15 = (12 + 3)
Pump and rescue support vehicle	15 = (12 + 3)
Pump and composite	15 = (12 + 3)
Two pumps and a hazmat support vehicle	21 = (12 + 6 + 3)

Mixed crew stations

Where retained firefighters are used to cover times when permanent firefighters are not on duty, the retained establishment is calculated as for a fully retained station, as they will be required to crew all the appliances at the station during those times.

For example, where permanent firefighters crew a pump during the day, and retained firefighters crew it at night, the retained establishment is 12. If the retained firefighters were also used to crew a water tanker at any time, the retained establishment would be 15.

If retained firefighters are not required to crew all the appliances available when the permanent firefighters are not on duty, the retained establishment is limited to only those appliances they are required to crew.

When retained firefighters are used to crew appliances additional to appliances crewed by permanent firefighters, the retained establishment is based on the crews required only for those appliances, with one appliance crewed by retained firefighters designated as their primary appliance and the others treated as additional appliances.

For example, where permanent firefighters crew a pump on the 10/14 roster, and retained firefighters crew a water tanker, the standard retained establishment is 6.

Tanker Only Stations

Where a Retained Fire Station has only a single appliance and that appliance is a water tanker the minimum retained establishment number for that fire station will be 12 retained firefighters.

Variations

There will be no variations to the minimum safe staffing numbers provided for in this Schedule unless otherwise in accordance with this Award and only by agreement with the FBEU.

Without Precedent / Without Prejudice
